

Infomedika and Picis Join Forces to Revolutionize Healthcare Automation

San Juan, Puerto Rico – September 2024 – Infomedika, Inc., a leading provider of advanced healthcare solutions in Puerto Rico, is excited to announce an exclusive partnership with Picis Clinical Solutions, a global leader in clinical information systems. This collaboration marks a significant milestone in Infomedika's mission to enhance healthcare technology and patient care across the island.

With this new partnership, Infomedika will integrate Picis' specialized perioperative software suite into healthcare institutions across Puerto Rico. Picis' solutions automate the entire perioperative experience, from preoperative assessments to anesthesia management and post-anesthesia care unit (PACU) operations. This end-to-end system ensures a contiguous patient record, allowing healthcare professionals to seamlessly access and manage critical information in real-time.

A Transformative Partnership for Puerto Rican Healthcare

Through this strategic partnership, Infomedika and Picis aim to empower healthcare professionals in Puerto Rico with innovative solutions that simplify clinical workflows and enhance patient care. Hospitals and clinics will now have access to Picis' integrated suite of perioperative solutions, enabling faster, more efficient decision-making and improving patient engagement. This new collaboration also aligns with Infomedika's ongoing efforts to bring state-of-the-art technologies to Puerto Rico, helping institutions deliver higher-quality healthcare while optimizing operational costs.

"We are thrilled to partner with Picis, a company that shares our vision for leveraging technology to improve healthcare delivery", said Carlos Torres, the new COO at Infomedika. "Together, we will provide hospitals with the tools they need to streamline their processes, increase efficiency, and ultimately improve patient outcomes."

Driving Innovation in Healthcare Technology

Picis' perioperative software enhances patient safety and seamlessly integrates with existing hospital systems to provide real-time insights into departmental performance, patient case costing, and financial data. This empowers clinicians and administrators to make informed decisions that support patient care and hospital revenue goals.

"We are excited to team up with Infomedika to deliver cutting-edge healthcare solutions to clients in Puerto Rico," explained Chris Lamont, Vice President, Sales and Marketing at Picis. "This partnership enables us to merge our advanced perioperative and anesthesia management solutions with Infomedika's specialized knowledge in the region, empowering healthcare providers with the tools they need to improve patient outcomes and streamline their operations."

Shaping the Future of Healthcare in Puerto Rico

Infomedika and Picis are committed to revolutionizing healthcare technology in Puerto Rico and bringing the best solutions to life-critical areas of hospital operations. This partnership is a step forward in their shared mission to improve patient care, reduce hospital costs, and optimize clinical and financial outcomes.

About Infomedika

Infomedika has been at the forefront of technological innovation in the healthcare sector for over four decades. By providing cutting-edge software solutions that optimize clinical and administrative processes, Infomedika has transformed healthcare delivery in most hospitals and clinics throughout Puerto Rico. The company's commitment to improving healthcare outcomes, profitability and process optimization continues to drive its success in the local healthcare market.

About Picis Clinical Solutions

Picis Clinical Solutions (Picis) is a global provider of clinical information solutions that automate the entire perioperative experience with one contiguous patient record, from preop to intraop and anesthesia through PACU. Picis continues to focus on and specialize in the integrated suite of solutions in life-critical areas of the hospital where the patients are the most vulnerable, the care process is the most complex, and an increasing majority of hospital costs and potential revenue are concentrated. The software enables rapid, sustained delivery of clinical documentation and financial and operational results. From department performance to patient case costing, hospitals benefit from the ability to interact with the data needed to help clinicians improve patient care, engagement, and hospital revenue goals. Picis Clinical Solutions, a wholly owned subsidiary of N. Harris Computer Corporation, is headquartered in Peabody, Massachusetts, and has licensed systems for use at more than 400 hospitals worldwide.
